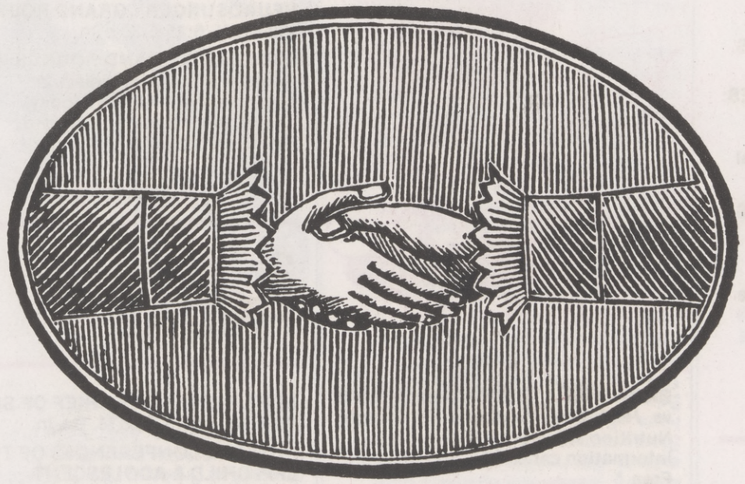
(Newsbriefs continued)

Spiritual health and how it can be integrated into the practice of medicine and psychiatry will be discussed at a one-day symposium at Oakland's Kaiser Center, Saturday, May 17.

Physicians, nurses, and other health care professionals, as well as clergy and legislators, will discuss spiritual healing—the third dimension of physical and mental healing—at this conference, sponsored by UCSF Extended Programs in Medical Education and the Alameda-Contra Costa County Medical Associations. For further information call 653-6320.

The Bank of America Giannini Foundation has awarded grants in the amount of $12,000 each, to nine health professionals in order for them to pursue research projects at UCSF. The recipients and the researchers with whom they will work are: Mark S. Brownfield (William F. Ganong, Physiology), David S. Chudwin, (Diane W. Wara, Pediatrics), Arthur Gutierrez-Hartmann (John D. Baxter, Biochemistry/Biophysics), David R. Knighton (Thomas K. Hunt, Surgery), Yun-Fai Chris Lau (Yuet Wai Kan, Medicine), William Ming Fu Lee (John C. Klock, Cancer Research Institute), Charles A. Linker (Marc A. Shuman, Cancer Research Institute), George P. Miljanich (Regis B. Kelly, Biochemistry/Biophysics), and Paul Volberding (Jay A. Levy, Cancer Research Institute).

Vol. 6 No. 9, April 26—May 9, 1980



A $798,000, four-year grant has been awarded to UCSF by the Robert Wood Johnson Foundation to help replace our general medical clinic with physician group practice. UCSF is one of 15 teaching hospitals in the country to receive such a grant.

The new UCSF group practice will provide around-the-clock, personalized care on a continuing basis to adult patients who presently use the hospital outpatient clinics and emergency room as their regular source of primary care.

The grant was awarded jointly to the Hospitals and Clinics and the Department of Medicine and will fund a major reorganization of general medicine programs at UCSF that will include both patient care services and residency training.

Steven A. Schroeder, associate professor of Medicine, is co-director of the reorganization project with Ronald D. Lipsy, assistant director, Hospitals and Clinics.

The Chancellor's Award for Public Service will be given on Wednesday, May 7, 2 to 5 p.m. in the combined lounges of Millberry Union. The winners are Roy Halliday, resident specialist in the Psychology Program, Department of Psychiatry, "for his talent, leadership and sustaining support of the Tri-City Clinic, a model program for community health centers," and Gregory S. Thomas, fourth year medical student, "for his innovative ideas in establishing the UCSF Runners Clinic, a model program emulated throughout the nation, thereby contributing to the lives and health of its participants and to the goal of preventive medicine."

The Thomas N. Burbridge Public Service Award winners are James Cobb, fourth year dental student, "for his extraordinary personal courage and dedication to the welfare of all those who were touched by the tragedy of Jonestown, without regard for his own life or career," and James Louie, principal administrative analyst, Affirmative Action Office, "for his leadership in Bay Area communities advocating equality of opportunity in employment, education and services, and for his continuing struggle to effect social change."

These awards have been given every year since 1971 to faculty, staff or students who perform exceptional community services beyond the scope of their work. Recipients of the Chancellor's Award are given certificates and $500. The Burbridge Award winners receive $600 each, and are chosen on the basis of commitment to social justice and equal education and employment opportunities. It is named for the late UCSF associate professor of Pharmacology, the 1971 winner of the Chancellor's Special Service Award for civil rights leadership.

The Reverend Amos Brown from the Third Baptist Church, S.F., will speak at the ceremonies. Freeman A. Bradley, director, Research and Development Laboratory, is chairperson of the committee.

9 FRIDAY

NEWS BRIEFS

Group Practice ... *(cont. from p. 1)*

The reorganization will involve the creation of two new academic units at UCSF—a Division of Family and Community Medicine, with responsibility for family practice programs at SFGH, the Fresno Valley Medical Center, Santa Rosa, Salinas and Fort Ord—all affiliated with UCSF; and a Division of General Medicine, headed by Schroeder, which will have responsibility for general medical care at UCSF.

The grant was awarded to Lloyd H. Smith, Jr., chairman of the Department of Medicine, and William B. Kerr, director of Hospitals and Clinics. Earlier programs in general and family medicine at UCSF were initiated under the leadership of Robert H. Crede, associate dean for Academic affairs, School of Medicine, as chairman of the Division of Ambulatory and Community Medicine.

Day-to-day administration of the new group practice will be under Lee Gately.

The Second Annual National Symposium on Sexuality and Disability will be held Friday through Sunday, May 16 to 18, at the wheelchair-accessible Claremont Resort Hotel in Oakland.

The symposium sponsored by Continuing Education in the Health Sciences, will address the sexual implications of spinal cord injury, cerebral palsy, visual and hearing impairments, head trauma, mental retardation, and developmental disabilities. Gay and minority issues also will be discussed. The general sessions will be interpreted in sign language. For further information call x3904.

The Dean's Prize in Student Research will be awarded to three medical students on Monday, May 5, at 4:30 p.m. in Room 214 S. The recipients are William Christiansen (2nd year), Sharron Sussman (4th year), and Richard Wear (3rd year).

The winners will present lectures on work accomplished as a result of research fellowships during the summer of 1979. Christiansen, who worked in the laboratory of Albert Jones, will speak on "Hepato-bilary Transport of Intestinal IgA." Sussman, from the laboratory of Kian Joe Lie and Donald Heynaman, will speak on "Anagglutinin in the Hemolymph of Biomphalaria glabrata." Wear will talk on "The Effect of Halothan on a Baroreceptor Response in Newborn Adult Rabbits." He is from the laboratory of Scott Robinson and George Gregory.

The Prize, which is awarded anually, was established to encourage medical students to participate in scholarly programs available at UCSF and to acknowledge outstanding work done by students in the Fellowship Program.

A symposium on Emergency Room Radiology will be held Wednesday through Friday, June 18 to 20, at the Emerald Ballroom, Holiday Inn, Golden Gateway, S.F.

The purpose of the program is to emphasize the increasing role radiology plays in the diagnosis and treatment of acutely ill patients. The program, sponsored by the Department of Radiology and Extended Programs in Medical Education, is designed for practicing primary care or emergency physicians who treat acutely ill patients. Both traumatic and non-traumatic conditions will be considered. The course will cover a wide range of topics including diseases and injuries affecting the skeleton, abdomen, chest, and central nervous system. For registration and program information call x5731.

A Blood donation Day will be held Monday, May 5, in the mezzanine lounge area, School of Nursing building, 8 a.m. to 4 p.m., and in the main lounge of Millberry Union, 10 a.m. to 5:30 p.m. Appointments may be made in advance by calling the Moffitt Blood Bank, x4013.

This is the second of three drives held annually. The first, held in February, netted the largest number of blood donations ever at UCSF—254 pints.

A hospitalized patient may directly benefit from a blood donation, or the donated blood may be earmarked for the UCSF Blood Bank Account, the UCSF Obstetrics Account, a personal account in the donor's name, or as a direct replacement in the name of any patient who has already received blood transfusions.

Once again the ASUCSF will sponsor the prize of dinner for two, with wine, at one of S.F.'s top restaurants. To be eligible, donors must drop their donation receipts in a box at either blood donation site.

The 1980 Charlotte Baer Memorial Clinical Faculty Award will be presented to Roberta F. Fenlon, clinical professor of Medicine, at the Annual School of Medicine Alumni Homecoming Banquet on May 31.

The award honors the late Dr. Baer, a 1941 UCSF School of Medicine graduate, and is given to a member of the clinical faculty for outstanding service to the School. Baer, who died in 1973, was the first woman president of the California Society of Internal Medicine (in 1971) and vice president and director of the San Francisco Medical Society. She also held medical degrees from the Geophe Medical School, Frankfurt and the University of Berne, Switzerland.

Fenlon, the first woman president of both the S.F. Medical Society and the California Medical Association, has been with UCSF since 1945. She is the recipient of the 1972 Distinguished Internist of the year Award from the Society of Internal Medicine, and is presently president of the S.F. Regional Cancer Foundation.

Charles H. Francis has accepted the position of Personnel Manager starting June 2. Francis comes from Sangamon State University in Illinois, where, as director of Personnel and Auxiliary Services, he was responsible for the direct administration of all facets of staff personnel programs.

At UCSF he will be responsible for Personnel Department practices including: Development and Training, Classification, Employee Relations, Unemployment Insurance, Benefits, and Employment. His extension will be 2621; office address is 12U.

J. Michael Bishop, professor of Microbiology, has been elected to the National Academy of Sciences, the nation's most prestigious scientific organization. Bishop was one of 59 new members elected to the academy, 13 of whom were UC scientists.

Bishop, who was the 1979 UCSF Faculty Research Lecturer, is an internationally recognized authority on the biology of tumor viruses and how they transform normal cells into cancer cells. He is well known for showing that the cancer genes within a virus are related to, and probably derived from, the genes of normal cells.

A native of Pennsylvania, Bishop received his undergraduate training at Gettysburg College, Gettysburg, Pa., and completed his medical training at Harvard University. Before joining the UCSF faculty in 1968, Bishop was a researcher at the National Institute of Allergy and Infectious Diseases, and at the Heinrich-Pette Institute, Hamburg, Germany.

The interest paid on voluntary contributions to UCRS Fixed Annuity Programs is no longer held at a fixed rate. January's interest rate was 8.58% (up from 8.13), February's was 8.8%, and March and April's rates will be reported by the end of April, along with the accumulation unit valves for the voluntary Variable Bond and Equity Programs.

The change comes about because of a new investment contract with Glendale Federal Savings and Loan that links the rate of return on fixed annuity deposits to the average of U.S. Treasury Bill rates. Since "T-bill" rates fluctuate regularly, the interest UC receives also changes. However, both investment contracts provide guarantees that UC will receive at least 8.33% interest before expenses, and give contributors the same maximum federal insurance on their accounts—now $40,000 per contributor for each institution.

The total program assets now amount to over $64.6 million; new contributions are close to $1.9 million per month.

The School of Pharmacy will host its annual alumni dinner on Saturday, May 10, at the Olympic Club, Lakeside at 7:30 p.m. A no-host cocktail reception starts at 6:30 p.m. The Alumnus of the Year Award will be presented, with acting Dean Eugene C. Jorgenson the scheduled speaker. For further information contact the Alumni Affairs Office at x1471.
